APPROVED SCANNING VENDOR SERVICE

Our Approach:

In order to be PCI DSS compliant, your organization must adhere to requirement 11.2: "Run internal and external network vulnerability scans at least quarterly and after any significant change in the network. Quarterly external scans must be performed by an Approved Scanning Vendor (ASV)." We start by configuring a custom PCI portal for your company to conduct ASV scans and generate your Self-Assessment Questionnaire (SAQ) report, if needed. Once the portal has been activated, a MegaplanIT security consultant will walk you through using the portal and provide you with recommendations for conducting and understanding the results of your first scan.

We use comprehensive network scans to identify vulnerabilities in your organization's environment and provide remediation assistance and recommendations to help you achieve your quarterly Attestation of Scanning Compliance. With thousands of approved scans under our belts, nobody is better qualified to help your organization through all aspects of PCI-DSS compliance.

YOUR CUSTOM PCI PORTAL

Key Benefits:

Our PCI-DSS SAQ Advisory self-service portal is a fully-branded, custom application gateway. Schedule ASV scans and complete your SAQ reports in minutes from your web browser. Easily enter client information, communicate with customers, print reports, and manage your compliance requirements. Whether you are completing a Level 1 Assessment with a third-party auditor or completing a Self-Assessment Questionnaire with your internal compliance team, the MegaplanIT scan portal will help you toward achieving your goal of PCI DSS compliance.

PCI SSC Approved Scanning Vendor

Free Training & Live Customer Support

Customized PCI-DSS SAQ Portal

Expert remediation advice and guidance

Ensure Compliance With Our
PCI SSC Approved Scanning Service

Levels 1 through 4 Merchants and Service Providers are required to perform external vulnerability scanning on a quarterly basis. Our scanning process perfectly matches the requirements of PCI-DSS.

External Facing IP's

A MegaplanIT security consultant will begin by identifying all external facing IPs that are in scope for vulnerability scanning.

Scheduled Scans

Our consultant will coordinate with your team to schedule scanning activities. Your productivity is a priority, which is why we make sure our assessments minimize disruption with your organization's workflow.

External ASV Scans

Once the external ASV scans are complete, the MegaplanIT consultant will review scan results internally to ensure accuracy. If any vulnerability exists, the MegaplanIT consultant will offer customized remediation consulting and perform retesting (if necessary).

Attestation of Scanning

Once your organization has passed the ASV scan, MegaplanIT will issue an Attestation of Scanning for submission to acquirers, processors, gateways, and other PCI stakeholders. We also provide detailed Technical Reports, including an Executive Summary, for your information and records.
